

## **Wrap-It Cohesive Foam**

Automated Solutions is your best resource for cohesive foam products. Our Wrap-It product line is made from our own in-house produced high quality polyethylene foam, laminated to a polyethylene film strengthening member, and then coated with cohesive glue, a cold seal solution that sticks to itself but not to your product being packaged. Wrap-It is designed to be a fast and easy protective packaging wrap application and does not require tape or staples to fasten. The cold seal glue holds your product securely in place and leaves no residue on your product.

## Wrap-It can be used for a variety of applications, including:

- Protecting exposed metal
- Protecting exposed wood
- Providing a cushioning layer for items being shipped
- Wrapping irregularly-shaped objects

We are proud to offer Wrap-It at high levels of quality and service that set us apart from the competition. Wrap-It products are available in standard 1/16" and 1/8" thicknesses and are sold in 48" bundles, slit and perforated to your requirements.
